

LED
PRO SERIES
Your guide to the retail experience 2.0

MULTIBRACKETS

Modular design endless possibilities. With strong ties to large AV distributors, installers and leading display manufacturers in the AV industry, we have the opportunity to develop head-end system-specific LED solutions for the needs the installation market demands. We strive to always create simple and intuitive LED mounting solutions for both digital signage installations and traditional room installations. Our goal is to constantly find ways to improve our offer of digital signage solutions for our partners and their customers. Maybe it's time for your company to discover a new level with our Pro Series LED solutions?

Use our knowledge in Digital Signage for your LED installations.

Use our knowledge in Digital Signage for your LED installations.

With our clever mounting system giving you our unique X, Y and Z axis fine tune adjustment possibilities, our Pro Series LED systems are designed to support many of the most creative LED configurations the market can offer.

Build close to any LED configuration and design display walls by your and your customers most ambitious ideas.

With Multibracket's modular based LED mounting design that attaches to the top, bottom and sides of the next bracket, makes it possible

to support 'endless' design configurations and still keep all displays in perfect alignment. Truly unique.

The time saver. Our LED video wall mounting systems come close to fully pre-installed. We pre-assemble all parts that can be pre-assembled (and tested) in our production. This will save a lot of time during the actual installation.

Flawless installation. Our LED video wall mounting systems also feature staggered mounting locations that protect the LED screens from being scratched or damaged during its installation. When the displays are in place, you can easily readjust them individually to each other via variable X-, Y- and Z-axis adjustments. The

result is a perfect positioned and flawless LED wall.

Fast shipping. Several of our more popular LED mounting solutions and their parts are in stock and ready to ship with very short lead times.

Made in Europe. Our production is also fast, which makes LED projects easy to specify, order, deliver and install. We welcome you to challenge your current supplier with your next LED inquiry sent also to us.

Swedish expertise

With many decades of combined experience, we and our distribution partners can help you reach a successful solution within LED.

Detailed solutions

We see all requests as a challenge. Maybe we've built it before, maybe it's the first time. With our flexible modular system, we have great opportunities to succeed in delivering solutions even for the most spectacular solutions that are requested.

Fast production and delivery time

If your idea and request is not within the stocked products, we can accept orders for what we call "tailor made" unique solutions based on the customer's needs. We normally have fast delivery of these solutions and can usually match the timetable presented.

We support all leading manufacturers

We support all leading manufacturers of LED displays. You decide. An appreciated

detail is that all dvLED solutions we deliver, regardless of panel manufacturer, have staggered mounting locations that protect the LED displays from being scratched or damaged during installation.

Customer-directed production

Our LED solutions are developed with requests as a basis. The solution is tailored to the smallest detail and is delivered completely complete with all necessary hardware to the installation site.

Produced after installers wishes

As our LED solutions are developed for and with our Scandinavian installers, they are extremely easy to install and have many smart adjustments to get the displays in perfect alignment with each other. You could say that they are designed for our Nordic climate. vårt Nordiska klimat.

This is how it works:

1.**Analysis**

Together with our partner, we build a solution in accordance with the customer's needs. We then complete the production and deliver a solution with our own manual and tools for quick installation. Our solution will save you assembly time and needs minimal adjustments after installation.

2.**We support all leading manufacturers**

Multibrackets supports all leading LED manufacturers on the market. You therefore choose the display supplier yourself.

3.**Various designs - the customer decides**

Our LED walls are mounted on a wall, on a floor stand, on a pillar between the floor and the ceiling, or built into the wall so-called "push in pop out".

4.**You approve**

We send a design proposal in accordance with your wishes. You then approve this for production.

5.**Ready to install**

Our production manufactures your specific solution and we deliver the order to your delivery address.

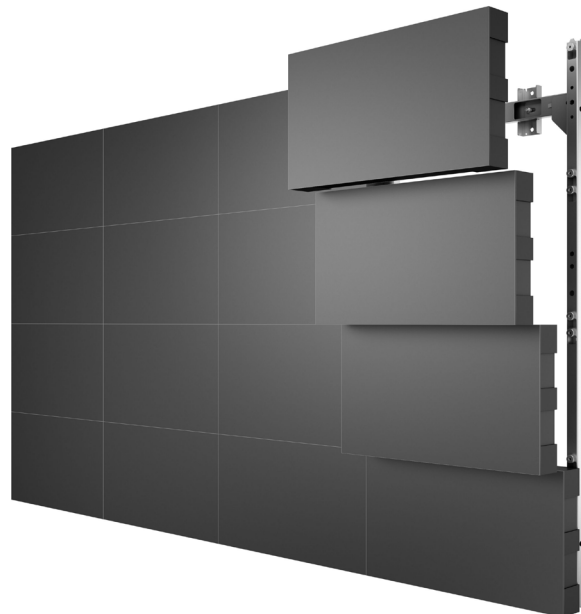

**Perfect delivery**

SAMSUNG

The Retail Experience 2.0

Customer behaviours are changing

The crises of recent years have led to dramatic changes in consumer behaviour. The retail chains will now have to work hard to meet the ever-changing customer experience requirements to stay relevant.

Multibrackets can supply all indoor and outdoor mounting equipment, for any project.

With the help of large LED displays and other display solutions there is an opportunity to update your market place completely. The opportunity to build a close experience with the customer is created through online and instore messaging. Multibrackets has an extensive group of competent employees who help give your business a complete - "Retail Experience 2.0".

We can also help find suppliers of complete solutions where we are a part. We help you win to win the battle for the customer as the competition for the customer increases, it is important for stores to distinguish themselves, create experiences you cannot get when you visit the company online. Engaging customers on site is the key to the future. The answer to the question of a new retail experience will in many respects be digital signage which now includes LED displays. A LED panel consists of a larger number of smaller led modules. These can be put together to form almost any shape. As the image has a high resolution, opportunities are created to build almost any type of digital experience,

mixing digital and physical that many have not seen the likes of. This also appeals to the group that shops online as you can add a dimension to the online experience that you don't get via a small screen at home or on a mobile phone.

Project start

Starting this type of project takes time and financial resources need to be set aside. Planning is crucial. Multibrackets cooperates with the market's leading suppliers of LED panels, we offer the mounting solutions. So regardless of the

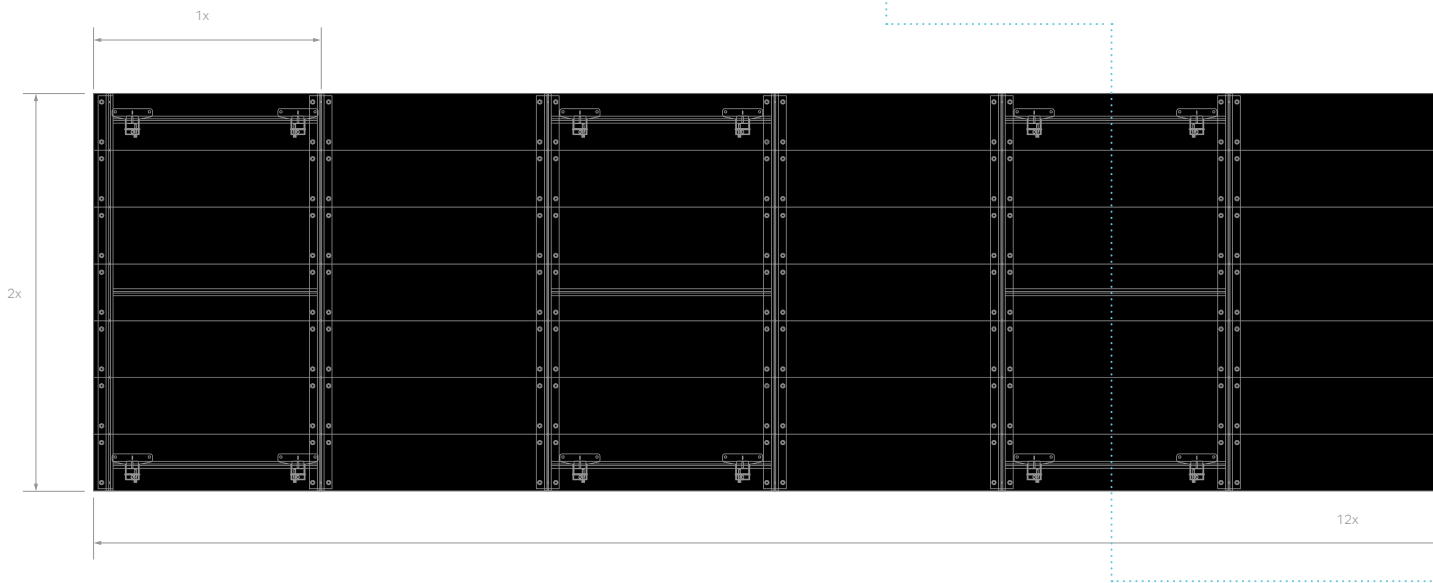

project, big or small with LED displays sitting on the ceiling, along the walls or in the shop window. Multibrackets assist in project and help tailor these solutions for each new project and each individual shop - completely individually. This is what we call: Multibracket Tailormade.
