Weekly Player

Automatic Message Player

Weekly Player

The Weekly Player is designed to play scheduled messages listed on SD. The player is able to play background music between the scheduled audio, has microphone input with priority and phantom power, supports external control in order to play or stop audio messages remotely via eight dry contacts. For a quick announcement start, the player provides front buttons for four recorded audio messages. The device is designed for any public place where scheduled messages are required - it can be used in shopping centers and entertainment venues, at schools or production facilities.
