

NovoConnect NC-X500

Cost-effective Solution
Wireless Collaboration Device

Overview

The NC-X500 is a cost-effective wireless collaboration solution meticulously designed for professional and educational environments. It enables seamless collaboration through its advanced 4K-to-4K mirroring capabilities, ensuring exceptional clarity and vividness in every presentation. Additionally, cloud-based management system available for enhances ease of use by providing efficient monitoring and control, ensuring the NC-X500 consistently delivers optimal performance and functionality.

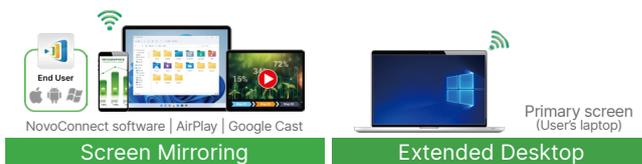

Key Features

NovoConnect Wireless Collaboration

The NC-X500 has built-in NovoConnect wireless presentation and collaborative tools for cable-free and hassle-free presenting in the classroom or in the office. Up to 64 participants can be connected and 4 can share their screen, each in 1080p resolution.

Bring Your Own Device (BYOD)

The NC-X500 supports connections from up to 64 participants, enabling up to four to share their screens simultaneously. This feature is made available users free of charge, aiming to facilitate dynamic and interactive engagements in meetings and classrooms, making it easier to present and discuss content in real-time.

BYOM (Bring Your Own Meeting)

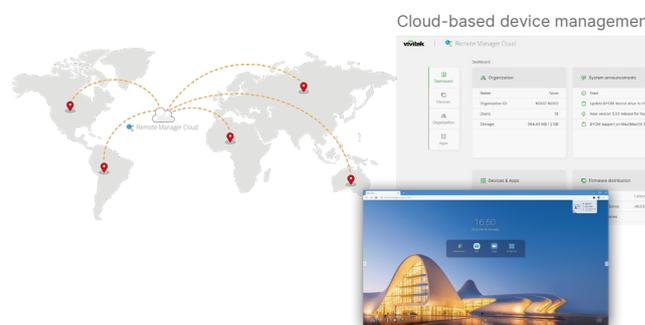

To empowers users to wirelessly link their computers to in-room AV devices such as cameras, microphones, and speakers, which ensures seamless participation in online meetings. Compatible with both Windows and MacOS, BYOM ensures a smooth integration of personal devices into the meeting environment.

Fast, Plug and Play Connectivity

Utilising the USB plug-and-play LauncherPlus, users can establish wireless connectivity between their laptops and the NC-X500, delivering instant screen mirroring without the need for physical cables. This plug-and-play feature simplifies the setup process, making it quick and easy to start presentations and keep meetings productive.

Dashboard, Device snapshot & Remote control

Receiver Screen Duplication

The NC-X500 enables screen duplication over the corporate network, so that the main screen can be duplicated across different rooms. This feature is ideal for large groups split across multiple breakout rooms, ensuring that everyone can share and view the same content.

System Integration and Control

The NC-X500 features SysControl for network-based management, including standby, wakeup, volume control, and source switching. Its cloud-based system provides a dashboard, remote control, firmware updates, and group management for streamlined maintenance and optimal performance.

Software- Wireless Collaboration

Model	NC-X500
Application	Education / Corporate
Wireless Collaboration Built-in	Yes, NovoConnect
