

Perfect-sized Display

22SM3G

22" Signage with More Utility for Commercial Space

With its webOS 4.0 smart platform, the 22SM3G has multiple ways to deliver information and wayfinding in Full HD on the perfect size screen for virtually any environment.

webOS Smart Platform

User Convenience

Convenient Maintenance

High Performance System on Chip with webOS

Built-in Quad Core System on Chip (SoC) can execute several tasks at once while providing smooth content playback without the need for a media player. Also, LG webOS smart signage platform enhances user convenience with intuitive user interface and simple app development tools.

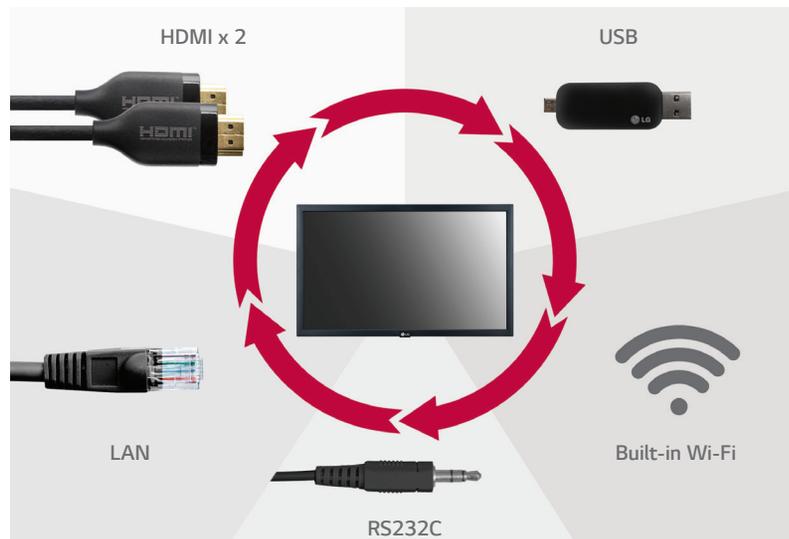

Various Sensor Applications

LG webOS smart signage platform easily supports connections with external sensors such as GPIO, NFC/RFID, temperature sensors, etc. via USB plug-in. Convenience and usability are maximized since there is no need to purchase additional software or media players.

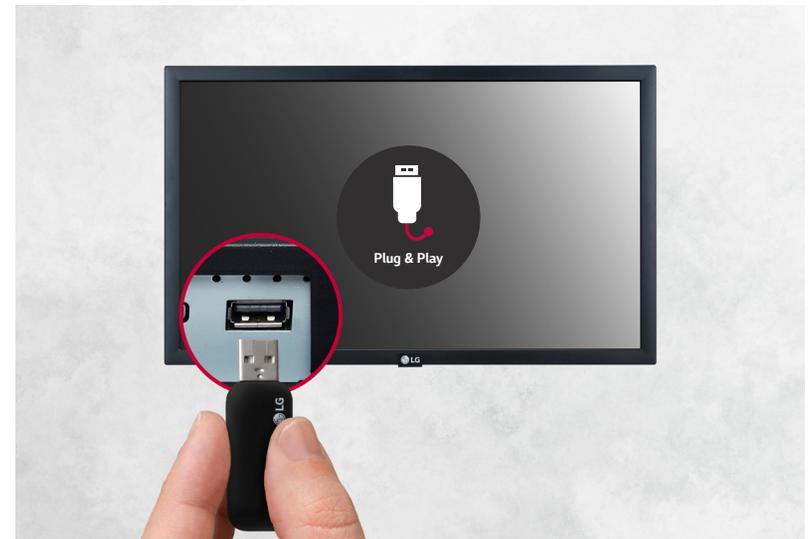

A Wide Range of Interfaces

Because of its various interfaces, users can connect the display with various sources for optimal use. Also, the failover function supports users preparing backup sources in case an unexpected error occurs.

USB Plug & Play

22SM3G supports the USB Plug & Play feature, so users can easily set content playback using a USB.

Content Sharing

Content Mirroring among devices can quickly be accomplished over a Wi-Fi network with the 22SM3G.

Real-time Promotion

With Beacon and Bluetooth Low Energy, store managers can provide coupons and information in real-time.

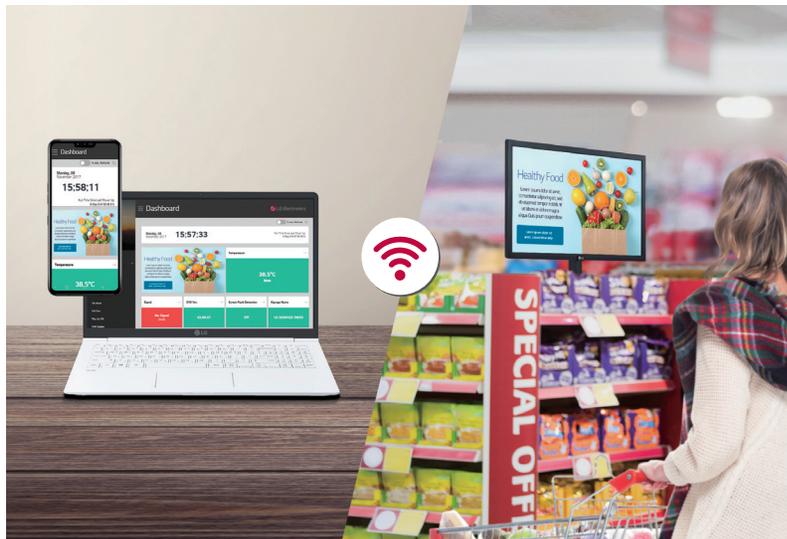

Wireless Solution

The 22SM3G can provide a wireless access point for mobile devices to access the internet.

Remote Monitoring and Control

Through the Control Manager, the embedded web monitoring solution, you can control and monitor the status of multiple 22SM3G displays in different locations in real-time. It is available on internet-connected devices, allowing you to flexibly and rapidly respond to urgent situations anywhere.

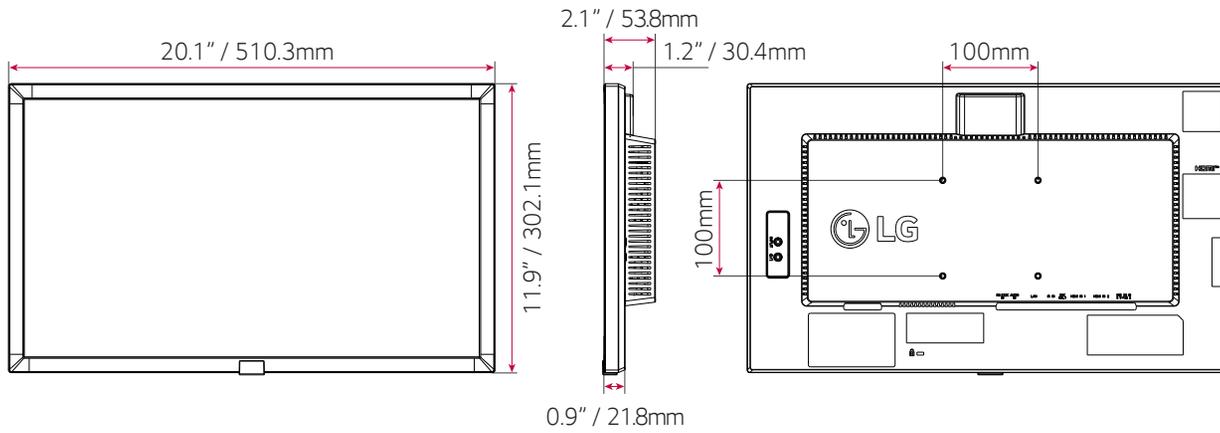

Real-time Care Service with LG Signage365Care

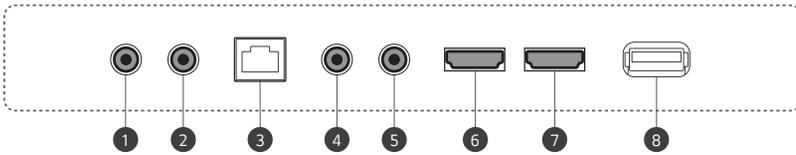

Maintenance becomes easier and faster with the optional service Signage365Care*, a cloud service solution provided by LG service. This service remotely manages status of displays in client workplaces for fault diagnosis and remote-control services, ensuring stable operation of the client's business.
