

Bring the Remaining Space to Life with Space-fitting 32:9 Widescreen

32:9 Wide Screen

Slim Design

700 nit Brightness

Convenient Maintenance

37BH7N-H Diagonal 37" Resolution 1,920 × 540 Brightness 700 nits

Product Size 36.3 x 11.4 x 1.7 in./ 922.3 x 288.3 x 43.5 mm

Compatible SuperSign CMS, SuperSign Control+, LG Software SuperSign WB, Mobile CMS, LG ConnectedCare

32:9 Extended Wide Format

With its ultra stretch format boasting a 32:9 aspect ratio, the 37BH7N-H is perfect for providing a custom look in spaces where typical 16:9 screens could look out of place.

Picture-by-Picture (PBP) Mode

The Picture-by-Picture (PBP) shows content up to two sub-screens within this single 32:9 ultra stretch display. This allows delivery of various advertisements or information at the same time in one display.

Customizable Angle to Suit Customer's Eye Level

With a tilting capability of 30° when installed at a higher location, the 37BH7N-M enhances customer perception of key messaging content.

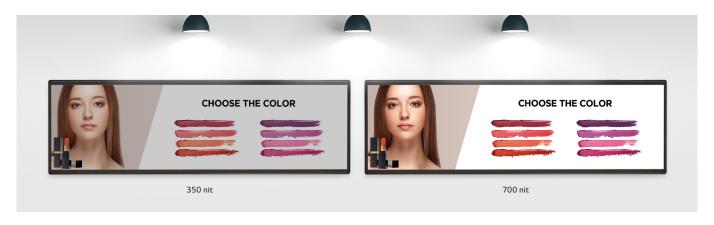

Portrait/Landscape Mode

The 37BH7N-H can be used vertically as well, allowing for flexible applications in various installation/usage scenes in both horizontal and vertical orientations. With the flexibility of being installed vertically or horizontally, this display can create a custom look installed in spaces where a typical 16:9 display would look odd or out of place.

Conformal Coating

In various interiors the 37BH7N-H may be unable to avoid exposure to environments containing dust, humidity, etc. which may hamper performance over time. The conformal coating on the power board reduces these risks by protecting UH7J-H series from dust, particulates, humidity, etc.

Indoor Display Offering a Vivid and Sharp Visual Experience

With a great brightness of 700 nits, the 37BH7N-H clearly delivers content and attracts attention, making it an excellent display for marketing in airports, retail, shopping malls etc.

Daisy Chain Management

A daisy chain allows you to conveniently and efficiently play the same content on multiple displays using just one media player. This eliminates the need to install separate media boxes for each display, as the entire operation can be handled by a single media player*, ultimately resulting in cost savings during installation.

 * You can play media by connecting an external HDMI.

High Performance with LG webOS 6.0

LG webOS 6.0 is available on 37BH7N-H for a smooth execution of several tasks. LG webOS smart signage platform enhances user convenience with intuitive user interface.

Real-Time Monitoring with LG ConnectedCare

Easy and Fast maintenance are available with our optional* cloud service solution LG ConnectedCare available at an additional cost disclosure. It allows you to remotely manage the status of displays in client workplaces for fault diagnosis and remote-control services, ensuring the stable operation of clients' businesses.

* Optional and available for purchase at an additional cost.

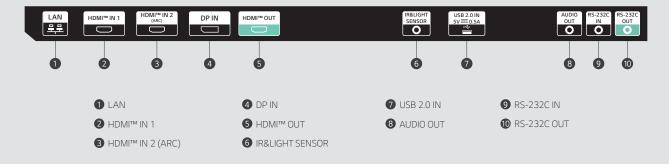

SuperSign

SuperSign is an integrated and intuitive content management solution for creative and organized digital signage content in your space, connecting customers to a range of services with convenient user experiences. There are a variety of versions such as SuperSign Cloud, so discover and enjoy the version that best fits you.
