# DL24B

DIGITAL PODIUM

## Connectivity In

## Connectivity Out

You can automatically adjust the height of the podium based on the height of the speaker with the DL23B, whose fundamental difference from the DL23B model product is the height adjustment motor found in the housing, and you can do this without the speaker noticing with the optional remote. You can capture the ideal image angle that will automatically adjust the angle of the multitouch speaker screen. You can also safely preserve the sliding cover by locking it when not in use.

	DL23B
Multi touch speaker screen	22"
Front Screen with Embedded Signage Media Player	43"
